

Model No.: **CDA-06**

- ✓ **Works with 2.4GHz for 802.11a/b/g products to extend Wireless Network coverage**
- ✓ **Flexible installation options Wall Mount, and Magnetic Mount**
- ✓ **Include a 1m Antenna Extension Cable**

## INDOOR ANTENNA

Extend your Wireless network coverage now! CNet's new range of Indoor Antennas provides a "range extension" solution for wireless-a/b/g Routers, Access Points and/or PCI Adapters. Adding either of these antennas to a CNet Wireless Router (with detachable Antennas) or a Wireless PCI Adapter (with detachable antenna) will improve signal strength/quality and increase the total coverage area. CNet's Indoor antennas are designed with wall and magnetic mounting types for convenient installation. To install, simply remove one antenna from the CNet Wireless Router/PCI Adapter and connect the indoor antenna, you are done!

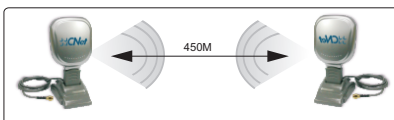

Model No.: **CDA-06**

## INDOOR ANTENNA

### Features

- Wall Mount, and Magnetic Mount
- Compliant with AP/Router with RM-SMA Connector
- Extends wireless network coverage to 450M .
- Easy installation
- Saves space and cabling cost

### Specifications

Model	CDA-06
Frequency Range	· 2.4GHz~2.5GHz
Gain	· 6dBi at 2.45GHz
Storage Temp.	· -20 ° ~+80 ° C
Operation Temp.	· -10 ° ~+60 ° C
Cable	· 1M
Impedance	· 50
Polarization	· Linear Vertical
Dimensions ( L x W x H )	· 156 x 80 x 85 mm ( 6.14 x 3.35 x inches )
Connector Type	· RP-SMA
Radiation Pattern	· Patch Directional
